

Special offer supporting Lupus in your community!

Jewelry designs as unique as the women who wear them!

# LAPIS FOR LUPUS 2009

Lapis Lazuli is a brilliant blue, opaque gemstone that has been used in fine jewelry for centuries. Our NUGGETS OF HOPE necklace is made of .925 sterling silver and features beautiful lapis nuggets, coin pearl, white agate and blue lace agate. Handcrafted in the USA, it is 32 inches long. It was designed especially for this campaign. Why not indulge in .925 in lapis for yourself while supporting this important and worthy cause.

***I am always interested in other ideas to help fundraise. Please contact me with your ideas!***

Lupus research is near and dear to our company. Our founder's sister was diagnosed with lupus six years ago. Around the same time the first consultant was hired, who one year later, lost her 12-year-old son due to complications linked to lupus.

Lupus is an autoimmune disease that affects various parts of the body, including the skin, joints, heart, lungs, blood, kidneys and brain. The immune system makes antibodies directed against itself. These antibodies cause inflammation, pain and damage in various parts of the body. Lupus affects nearly two million Americans. Somebody YOU know has lupus.
